ESSENTIA

Dg Foto Art – Essentia, is a Fast & Easy software tool to create Digital Albums. It can compose stunning Albums in minutes with ease using blend of easy-to-use tools, ready-to-use Templates and huge library of added décor. Being stand-alone Dg Foto Art – Essentia is independent of any third party tools or plug-ins.

To simplify the process of designing Digital Albums, Dg Foto Art Essentia is packed with exclusive features like:

## Compose:

- **250 Ready-to-use Templates:** of various sizes designed for different occasions.
- **Customized Template Page size:** in centimeters, inches or pixels and print resolution too.
- **Multiple Alignment Options:** helps align multiple pictures at equal spacing automatically and quickly.

## Decorate:

- **Instant SEPIA and Black & White Tones:** Featuring 7 ready-to-use tones including B&W and SEPIA. Tones can be applied on any photo at the click of a button. You can also create, save and reuse your own Tones.
- **Huge Library of Clipart, Borders, Masks, Textures and Filters:** provided for giving exclusive looks to your Album pages.
- **Ready Shapes:** like rectangle, ellipse, rounded rectangle and lines to add a decorative look to your creative Album pages.

## Edit

- **Lasso Tool with Auto Feather:** removes unwanted portions of a photo for replacing the background. A Feather is also applied automatically around the edges of the cutout portion.

- **Cropping Photos:** allows instant cropping of any picture with great ease, be it within a Frame or otherwise
- **Text Editing:** Tool can instantly add texts to the Template pages by using any True Type fonts. Drop Shadows, Outline, Textures, and Thickness can also be applied.

## Enhance

- **Photo Enhancement:** enables color-correction on selected portions of a photo. Multiple selections can be made and manipulated independently.

- **Drop Shadow:** set a shadow direction, shadow distance and add opacity and softness.
- **Instant Outlines:** to photos in the Template pages.
- **Set any Photo as Background instantly:** which can further be manipulated to suit requirements.

## Export/ Print:

- **Unique Slide Show:** creates a self running file (EXE) containing slides of the Template pages. This file being small in size can be easily sent as e-mail for customer's approval before printing.

- **Export Multiple Pages simultaneously:** thus saving time. One can even select or deselect the pages to be exported with the help of thumbnail.

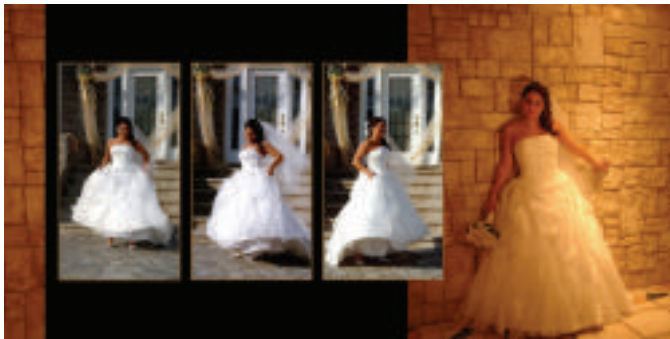

## Exclusive Features:

- **Universal Graphic Format support:** supports all standard file formats like JPG, BMP, GIF, TIF, TARGA.
- **Used Photo Indication:** helps mark photos distinctly with a red outline. This is a very useful feature for tracking usage of photos.
- **Story Board:** enables viewing of the innumerable thumbnails of the created Template pages. It gives a vivid idea about the templates already designed and also helps maintain the story line of the album.
- **Unique Color Picker Tool:** enables selection of any color from the screen. The selected color can be applied to backgrounds, outlines, shadows, shapes and text.
- **Instant Reordering of created template pages:** can be made by moving the thumbnail of Template pages with the page numbers automatically assigned after reordering thereby saving time.
- **Working on Multiple Pages Simultaneously:** giving you the exact feel of album that will be printed.
- **Replicate Photo Properties:** over any other photos repeatedly. This feature is very useful for application of favorite Tones, Masks or Filters to multiple photos.
- **Smallest Project size:** helps saving a lot of hard disk space. This also enables your projects to open and save very quickly.
- **Auto Save:** feature automatically saves the current page and updates its thumbnail in the story board, the moment a new page is opened. Also at regular intervals the work is saved thus there is no risk of losing important data.
